

SemiCrafter: The Art of 3D TCAD Mesh Generation

© 2010 Crosslight Software Inc.

SemiCrafter

What's SemiCrafter?

- A powerful 3D TCAD mesh generation/editing tool.
- Based on the CSuprem(3D) simulation program .
- Cutting/refilling a stack of mesh planes to construct complicated 3D mesh in multi-domain.

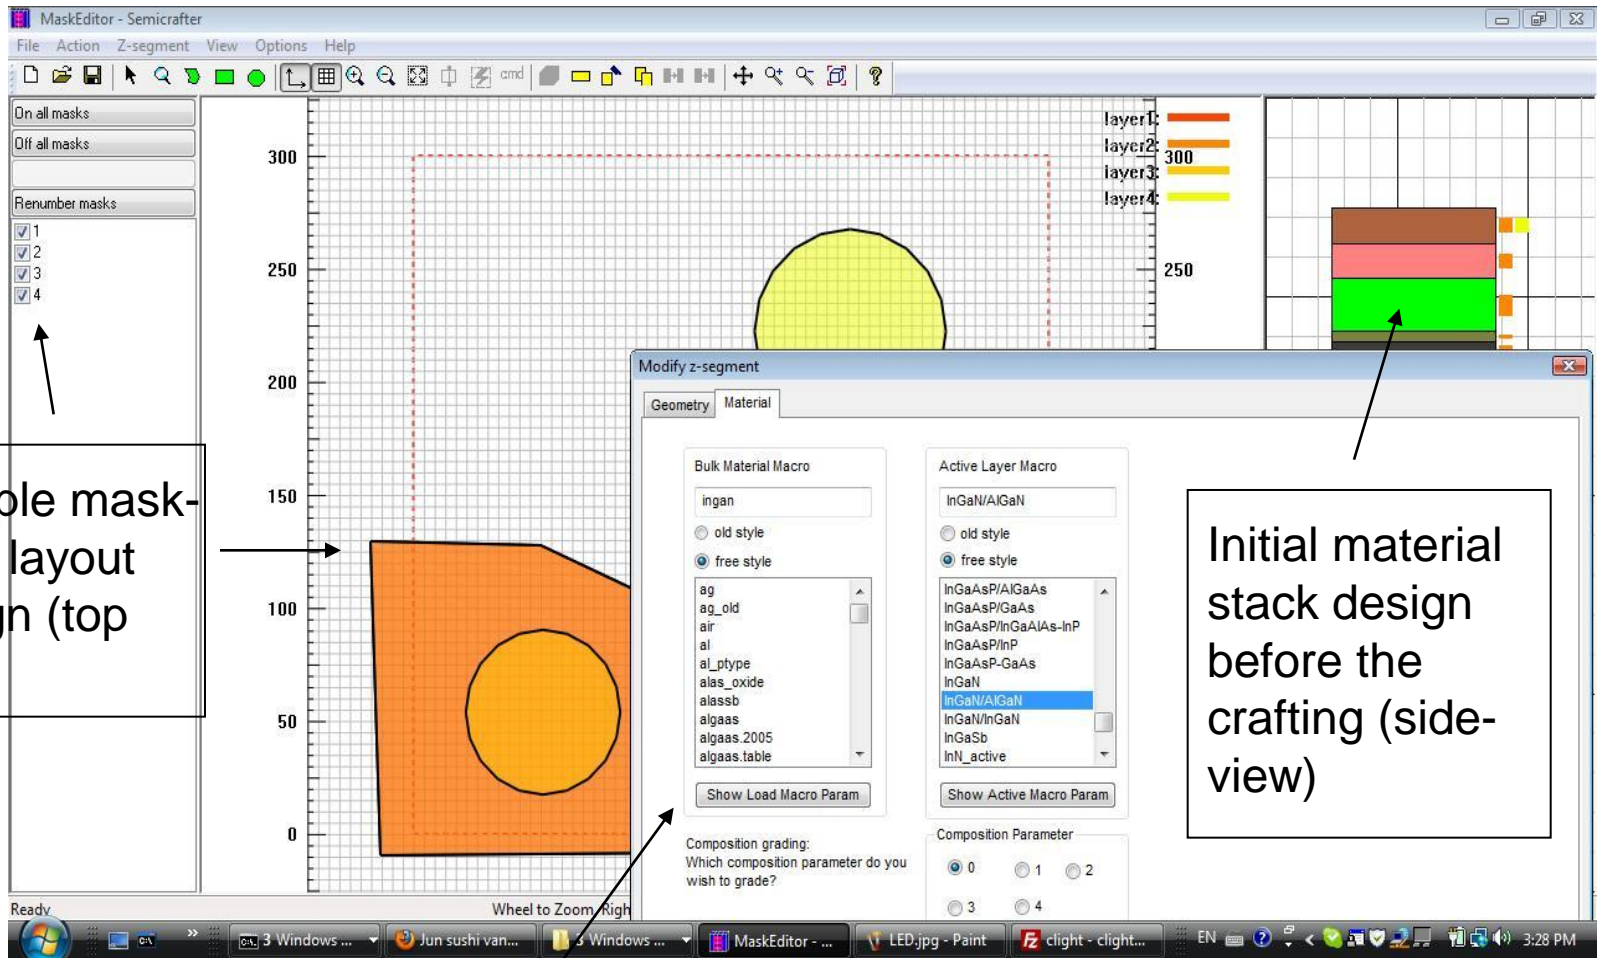

What are the Applications?

- SemiCrafter is a general purpose layout/mesh-generator.
- Works seamlessly with CSuprem to create 3D structure for virtually all types of semiconductor devices, like LED, solar-cell, MOSFET etc.
- Most suitable for 3D geometry with rounded shapes, such as complex electrode layout in LED, photonic crystal in LED/VCSEL, power MOSFET with rounded gates, etc.

Get to know SemiCrafter with an LED Example

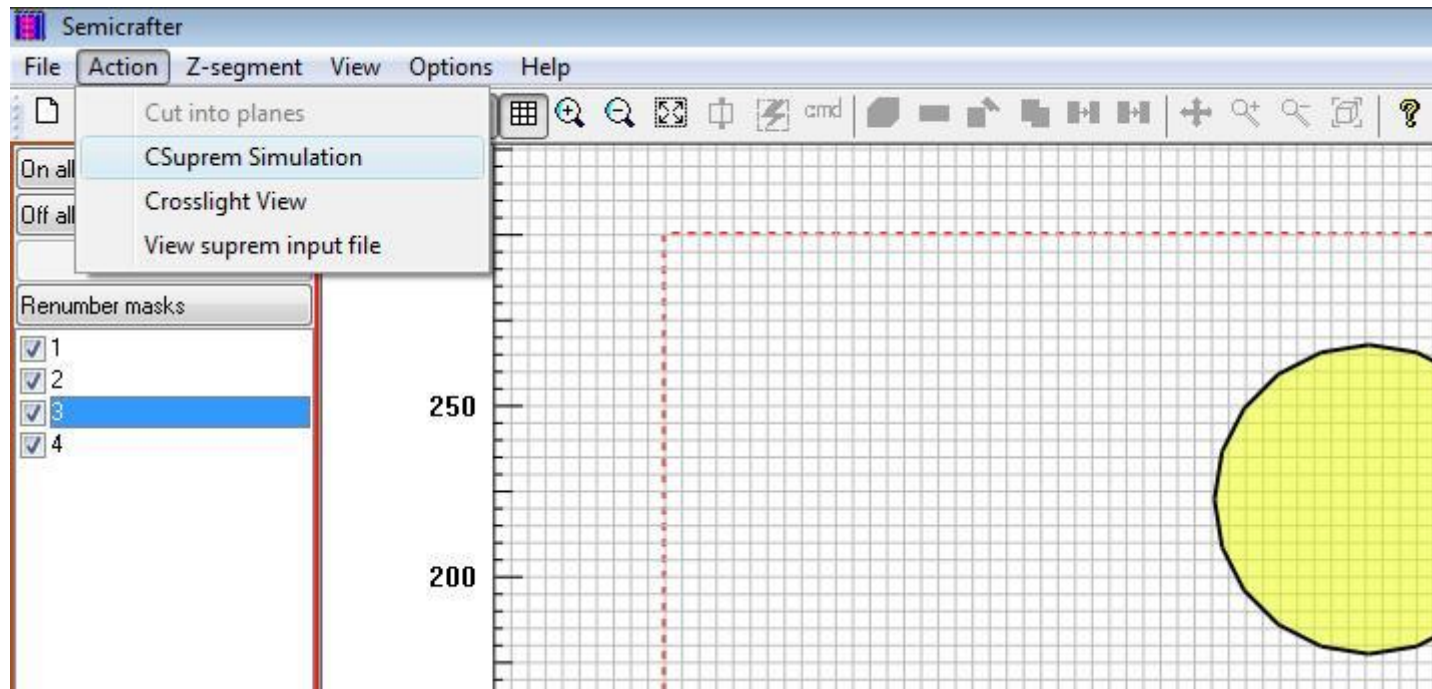

Multiple mask-layer layout design (top view)

Initial material stack design before the crafting (side-view)

Access to dozens of Crosslight material macros

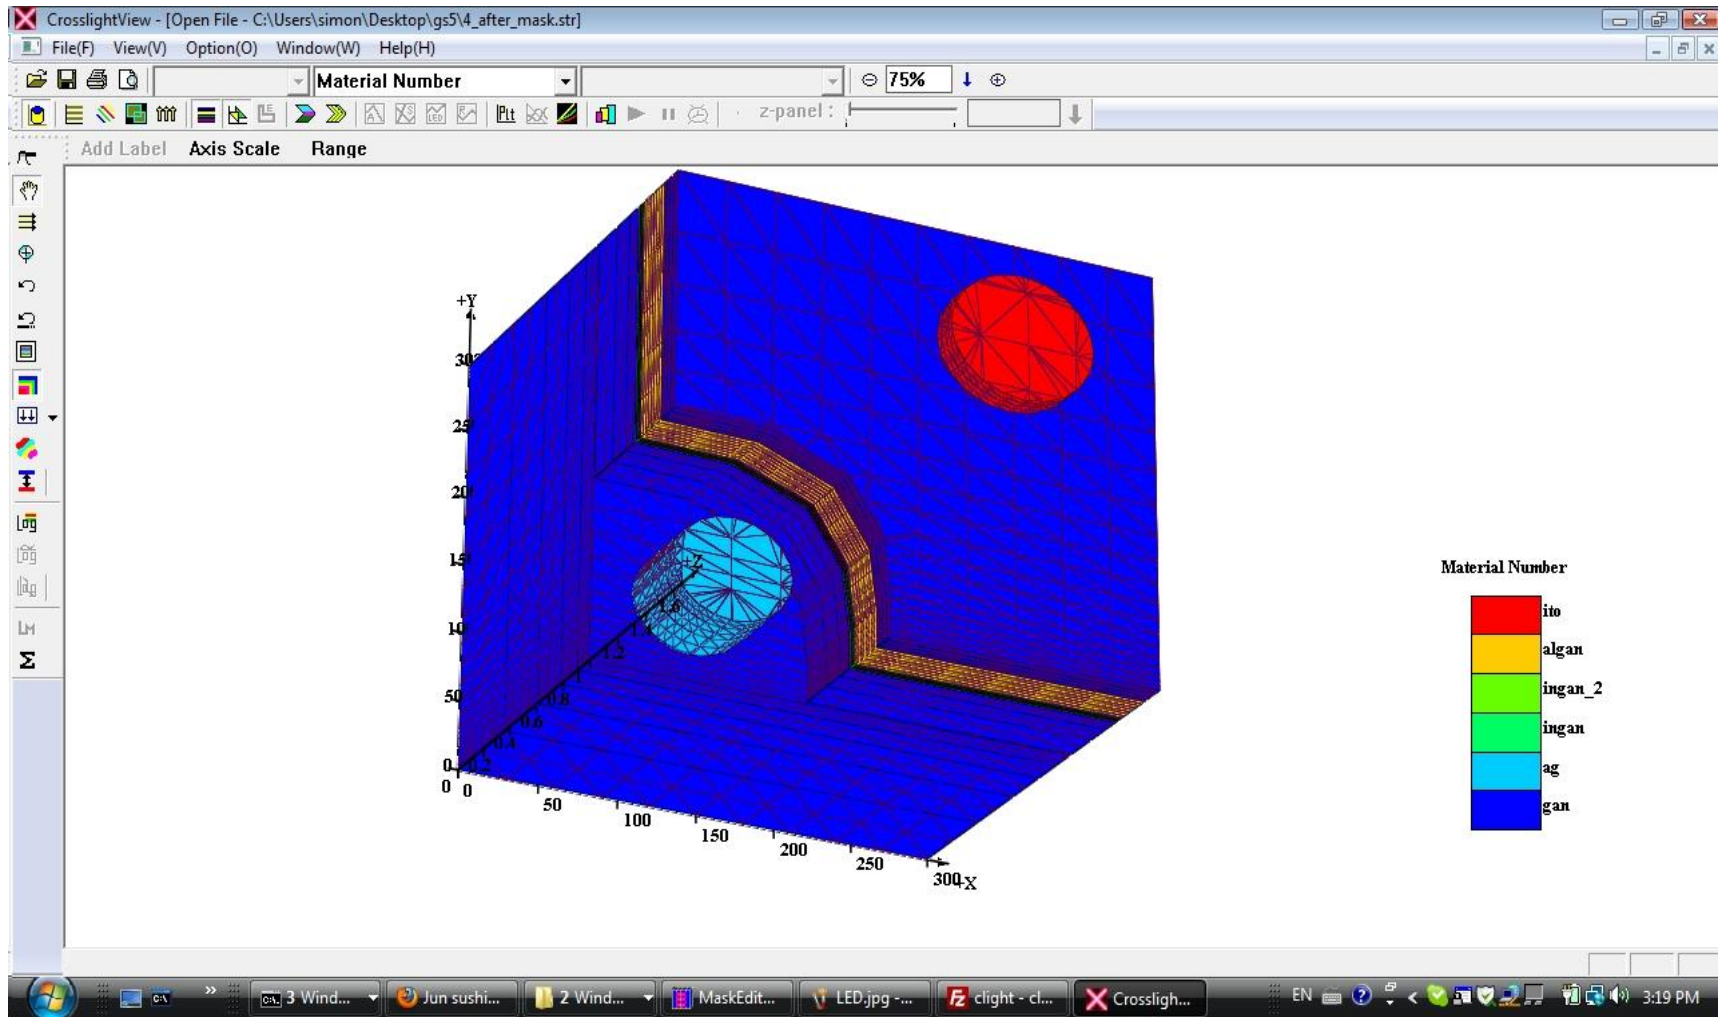

Direct integration with CSuprem

- Just “save” to generate CSuprem input file.
- Direct integration with CSuprem and CrosslightView.
- Monitor crafting process step by step using the “restart” feature in CSuprem.
- Truly “what you see is what you get” tool.

About Crosslight

- A leading TCAD provider since 1993
- Complete product portfolio for semiconductor device simulation
- Innovative simulation tools to ensure a fast and seamlessly transfer from process to device simulation
- Ultra efficient 3D structure combined with powerful and easy to use 3D editor to provide class leading 3D simulation experience
- “**Café-time Simulator**”. Windows based, user friendly graphic user interface makes simulation more enjoyable.
